Intelligent key management systems!

Key Leave&Collect System (Indoor)

For car dealerships, vehicle workshops and car rental companies

The new Key Leave&Collect System (Indoor) offers your customers the comfortable level of service they have come to expect: Vehicle collection at a time that suits them. This system is extremely secure, because keys are stored within the building, and when the vehicle is ready for collection, you simply send your customer an agreed code number by telephone, email or SMS. Upon collection your customers then input this code into the Key Leave&Collect System (Indoor) and they are issued their vehicle key or key card.

Leave & Collect
