

NØGLEIND- OG UDLEVERINGSSKAB MODEL N

The secure deposit and retrieval safe for valuables

The bring&hol (Drop-off and Collect) Sikkerhedsskab S 680 is a deposit and retrieval safe for items such as keys, documents and valuables. The system is certified in accordance with EN 1143-2 / D-I ECB and is fitted with a rear door (rear-load version) and key lock. The deposit facility guarantees secure storage of deposited items and has a patented retrieval function. Similar systems with EDS certification have proven invaluable at banks, petrol stations and retail stores.

Despite the top security features, the system remains thoroughly user-friendly: user operating prompts are conveniently displayed on a 5" touch screen, while an archive function ensures that all opening and pick-up operations can be scrutinized.

Your security plus

- Easy programming via web interface (tablet and smartphone) network and WiFi
- Can be connected to the burglar alarm system
- Convenient administrative software and electronics modules
- Up to 24 keys can be given out
- Prepared for video monitoring of sliding compartment

Construction and functionality

- Compact construction, weight approx: 400 kg
- External dimensions: 1550 x 600 x 900 mm (HxWxD)
- Deposit box: 200 x 300 x 100 mm (HxWxD)
- Operating voltage 220-240 V, 50-60 Hz
- Code-memory function in the event of a power cut
- Blocking function triggered after unsuccessful retrieval attempts

Security advice

Please contact your insurance organisation concerning the precise details of assembly and installation as well as the insurable sum. If a burglar alarm system is already in place, we would recommend using the corresponding alarm package and have the connection performed by the contracting company.

Construction advice

The exterior of the deposit facility is made of coated stainless steel (RAL 7035 light grey), but we would nevertheless recommend installing the system in a position that is protected against the effects of weather and moisture, otherwise we will be unable to accept any warranty against cor-rosion or functional failure.
